DETAILED ACTION

Status of Claims

1. Claims 1-6 are pending.
2. Claims 1-6 are rejected.

Response to Arguments

3. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Information Disclosure Statement

4. The information disclosure statement of March 23, 2006 (1 sheet) has been reviewed and considered, see enclosed copy of PTO FORM 1449.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-6 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 12-34 of U.S. Patent No. 6,890,943.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instantly claimed subject matter as well as the prior art reference of U.S. Patent No. 6,890,943 teach of the administration of the pyridoxal analogue compounds, as set forth in claim 12 of U.S. Patent No. 6,890,943, along with the concurrent administration of a therapeutic cardiovascular compound selected from the group consisting of a calcium channel blocker, an anti-thrombotic agent, a β -adrenergic receptor antagonist for the treatment of cardiovascular and related diseases, which is defined in the specification of U.S. Patent No. 6,890,943 as embracing the condition of blood coagulation diseases, (see claim 26).
